

#1 in Dodge Cummins Performance

New 6.7L tuning software release!

All 5.9L tuning softwares have been totally revised!

Starting from this version all 5.9L softwares are now UDC capable.

The main goal of the complete overhaul is CLEAN power.

The power in levels is now more linear and has gained +/- 10% power at peak.

In short, just to mention a few:

- New Base software
- New duration maps
- New timing maps
- More linear power
- Overall driveability improvement
- Better mileage
- The default timing (# 2) is now the highest one.
Timing # 3 is less timing advance than # 2.
Timing # 4 is less timing advance than # 3.

Thanks for your attention!
