## #1 in Dodge Cummins Performance

- In "Smarty Update Manager" removed the management of ME softwares, no longer available.
- Improved handling of the two side panels and left horizontal panels resizing.
- Enabled the command "Read info from Smarty..." in demo version.
- Added a warning message if the application is started without a main dongle but with one or more VIN # dongle.  
The message warns that the application is in demo mode.
- Added proportional resizing of the control panel buttons when the screen font scale is set to 125% or 150%.
- Vertical scrollbars bug fixed.
- Various improvements.

### Version 1.1.5.0 - IMPROVEMENTS

---

- Now .smt files have been associated to SmartyUSB.exe.

#### **APPLICATION**

- Added Remote Tuning Guide in Help menu.
- Missing, or corrupted, Arial fonts handling.

### Version 1.1.4.0 - IMPROVEMENTS

---

#### **SETUP**

- Changed the setup procedure, a more easy way to handle the required installation of .NET Framework if this is not yet present.
- Improvement in the installation of the FTDI drivers and related support software. This will prevent randomly occurring issues related to the installation.
- Improved the reliability of the setup procedure.

#### **APPLICATION**

- Improved "Smarty -> Smarty Update Manager" process.
- Added a "Default" button in "Tools -> Basic Options..." menu to allow a quick and easy way to restore configurations default values.
- Added in "Tools -> Basic Options..." new comments for every option.
- Improved data input in "Tools -> Basic Options...".
- Improved the procedure for the manual Smarty upgrade. The user will be guided and helped in the setup sequence.
- Minor bugfixes.

**#1 in Dodge Cummins Performance**

**Version 1.1.3.0**

---

- Release
